DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Prior art does not disclose a claw-pole permanent magnet stepping motor having a first and second case units having a rotor with first and second permanent magnets and the rotor supported between the first and second bearings, in which the bearings are located within the first and second case unit. The first and said second case units have an arcuate section, with a side wall section joining each respective arcuate sections in a continuous flattened-oval section about the rotor, In combination with the arcuate sections has a diameter and length at a 1:1 ratio. In addition to a first and second phase inductor are formed of magnetic plates that have claw poles having a first and second coil with each having a set of connectors and the claw-poles face a continuous flattened-oval section of the side walls in order to reduce the claw-pole magnetic stepping motor and prevent external flux leakage to allow the use of magnetic devices while providing an adequate rotational torque.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
